# INNOVATIVE THINKING, PERSONAL APPROACH

Bennett Project Solutions provides multidisciplinary project and construction management services to the civil, infrastructure and mining sectors. Established in 2016 Bennett Project Solutions forms professional relationships with like-minded companies and individuals to meet specific project requirements or assignments.

The company has working experience in Australia, Asia and Africa, and in remote locations. Our success is underpinned by our personalised service and innovative approach to each project or assignment.

## OUR SERVICES

Bennett Project Solutions offers the following services:

- Multidisciplinary project and construction management
- Civil, infrastructure and mining
- Studies – Concept, Prefeasibility and Feasibility
- Specialist tailings dam management

OUR VISION IS TO BE THE PREFERRED SMALL CONSULTANCY SERVICE PROVIDER OF MULTIDISCIPLINARY PROJECT AND CONSTRUCTION MANAGEMENT SERVICES IN THE CIVIL, INFRASTRUCTURE AND MINING SECTORS BY providing personalised, quality, and innovative services to clients that exceed their expectations.

# HOW OUR CORE VALUES LEAD TO BETTER OUTCOMES

Our core values shape the way we work and who we employ and form associations with to ensure we provide optimal service from concept to completion. At the core of Bennett Project Solutions we adhere to safety and quality in both design and execution of works and always act with professionalism and integrity.

Bennett Project Solutions provides their clients with:

- Cost-efficient and effective solutions for professional services
- Added value by providing alternative and innovative solutions which deliver appropriate and economical outcomes
- Seamless interactions and communications throughout the project lifecycle
- A team of highly experienced professionals focused on delivering quality results
